

Technical Advisory – Fuel Cost Enhancements

This update describes the enhancements made to the handling of fuel costs within TREDIS 5.

1. Fuel prices have been updated to current prices as of January 2017.
 - a. Price is now available by state/province replacing Petroleum Administration for Defense Districts
 - b. Gasoline, diesel, aviation fuel, marine fuel, CNG, and electric prices have been updated.
2. Custom modes can now be created with different fuel types from their template model.
3. Fuel prices can be modified over time from the Travel page. These costs can be found in the Taxes, Fees, Tolls tab of the input form.
 - a. By default, fuel prices will be constant over the analysis period based on current prices.
 - b. Fuel costs listed here are inclusive of taxes.

Note – If changes to federal and/or state fuel taxes are made, then the fuel cost needs to be updated to reflect the tax changes.
