

Technical Advisory – Improved Project Export

New features have been added to the project export functionality, combining the batch analysis contained in Multi-Run with project export. The result is more flexibility and improved performance.

Located within Group Options on the Project Screen, Select the projects you wish to run the analysis, the click the Multi Run & Export button. A new dialog box opens providing you with the options for running your analyses and to export the results:

If you include an email address, your results spreadsheet will be emailed to you upon completion. This is very useful if you are running large numbers of projects.

Once the analyses for all selected projects are finished an orange download spreadsheet button appears so you may download the results if desired. Or, you can visit the results page for any of the analyzed projects to see the detail results without needing to run the analysis again saving time.

Note – If any of the selected projects were analyzed previously and the analysis settings are the same as specified in the Multi Run settings screen, the system will use the previous results, saving you time.

Also, the export spreadsheet was enhanced to show the settings used to run the analyses:

	A	B	C	D	E	F	G	H	I	J	K	L
1												
2		Base Alternative		Base		B/C Perspective		National Perspective				
3		Project Alternative		Project		Inflation Rate		3%				
4		Economic Activity		Compare Project vs. Base		Cash Flow		Real				
5		Impact Type		Total Impact		Discount Rates		3% 7%				
6		Results Year		2020		CO2 Cost Increase		3% (Annual)				
7		Interpolation Method		Compound/Annual Growth		Market Access Region		NA				
8		Depreciation Type		One-Time Project		Occup. Aggregation		2 digits
